## **Curtis Introduces the New Kubota BX Series Curtis Cab for Sub-Compact Tractors**

WORCESTER, Massachusetts (March, 2013) -- Curtis Industries, LLC has introduced another cab system for the Kubota line of Sub-Compact Tractors. The new BX Series Curtis Cab fits multiple models and features a wide variety of enhancements for improved comfort, visibility and durability.

Adding to its extensive line of quality cabs for Kubota, the BX Series Curtis Cab offers a soft sided version and a hard sided version which includes full sliding glass windows for optimum ventilation and pin-hinged doors for quick and easy removal.

With a tilted Rollover Protective Structure (ROPS), the operator can work in a safe and efficient environment and the structured steel frame provides the strength and durability needed for heavy-duty work.

The windshield is made of AS2 tempered safety glass with internal latches to allow maximum circulation. Also standard with the new BX Series is the pre-drilled holes in the rear for easier wiper installation. This new cab system is less than seven feet in overall height (with ROPs folded) for easy storage in a homeowner's garage.

Scott Nelson, CEO of Curtis Industries stated, "We're excited about this new product launch. Listening to our customers is what drives our innovation here at Curtis." He also added, "Not only do we put our focus on innovation and quality but we're always thinking of new ways to provide our dealers with the best tools possible to help them succeed."

The BX Series Curtis Cab also includes new options for accessories which include adjustable, low amp draw LED lights for a longer battery life and vehicle style mirrors. High performance heaters, defroster vents and work lights are also available.

Curtis Industries, LLC is the leading manufacturer of cabs, enclosures and accessories for compact tractors, golf cars, and utility vehicles. The company, which started in 1968, also manufactures truck plows and snow and ice control equipment for tractors and utility vehicles. Curtis Industries, LLC markets its products exclusively through a large network of dealers in the United States and Canada as well as Japan, Korea and Western Europe. The company operates from a modern 150,000 sq. ft. facility in Worcester, MA.
