**Curtis Industries Introduces Cab System for  
Massey Ferguson® GC1700 Series Tractors**

*Now available through authorized Massey Ferguson dealers throughout North America*

Worcester, Massachusetts, April 2014 — Curtis Industries LLC, manufacturer of cab enclosures, attachments and accessories for compact vehicles, is pleased to announce the release of its cab system for the Massey Ferguson GC1700 Series sub-compact tractors.

The all-steel cab frame, doors and roof are constructed of powder-coated commercial grade steel, providing the operator with style, comfort and durability. From rural to urban applications, this versatile cab system features tilt out windshield and dual sliding glass windows for superior ventilation in any weather condition.

The cab mounts independently of the existing factory ROPS (Roll-Over Protective Structure). Total-seal doors are pin-hinged for easy removal. For tractors equipped for backhoe operation, the rear panel removes quickly and pop-up roof is supported with gas shocks.

A second cab version is available with vinyl doors that feature a welded structural-steel frame, full perimeter weather stripping and clear vinyl rear panel. Both cabs fit the full line of Massey Ferguson GC1700 series tractors (GC1705, GC1710, GC1715 and GC1720).

“The GC1700 cab is the result of exceptional cooperation between Curtis and AGCO,” said Michael Alexander Vice President of Marketing and Sales for Curtis. “The product teams worked closely at every phase of development and the result is a truly outstanding cab system.”

Curtis is the preferred supplier for aftermarket sub-compact tractor cabs.

“Working with Curtis on this project was a true collaboration,” said Warren Morris, Advanced Product Marketing Manager for AGCO. “Our sub-compact tractor customers demand versatility, comfort and ease of use, and this new cab helps us further deliver on those needs. This cab is well integrated and matches the tractor’s durability and color scheme.”

Cab features include lockable doors and a 12VDC windshield wiper. An optional rear wiper is available for the all-steel cab. In addition to standard features you can customize the cab with Curtis accessories such as roof-mount LED strobe and work lights, rear work lights, mirrors and heater.

“We’re excited about launching this new Massey Ferguson cab,” added Alexander “It’s one more quality product in our innovative product lineup that gives Curtis dealers the best products and most value for their money.”

\*Massey Ferguson is a worldwide brand of AGCO.

### **About Curtis Industries**

Curtis Industries, LLC, an ISO 9001: 2008 certified company, is the leading manufacturer of cabs, enclosures and related accessories for compact tractors, golf cars and utility vehicles. The company, which started in 1968, also manufactures truck plows and snow & ice control equipment for tractors and utility vehicles.
