**Curtis Industries Introduces Canopy and Windshield  
For John Deere® Gator T-Series UTVs**

*Worcester, Massachusetts, June 11, 2014* – Curtis Industries, LLC manufacturer of cab enclosures, attachments and accessories for compact vehicles, announces the release of its canopy and folding windshield for the John Deere Gator TS, TX, and TE model UTVs.

Constructed of molded high-density polyethylene, the canopy offers an excellent combination of toughness and light weight. Aluminum support tubes mount directly to the Gator chassis bracket for improved strength and stability. No drilling is required, significantly reducing installation time.

The front canopy frame is secured in a 13" reinforcing channel to reduce movement and prevent cracks and squeaks.

The folding, removable windshield opens for added ventilation and visibility. Made of impact modified acrylic for superior strength, the windshield secures in place with rubber latches for safe operation open or closed. Windshield removes easily without tools.

The Gator canopy and windshield provide cover from bright sunlight or light rain as well as protection from tree limbs, debris and overhead hazards, but still allows easy entry and exit from the vehicle. It's ideal for recreational use as well as landscaping, grounds & facilities management and municipal operations.

Curtis optional accessories such as roof-mount LED strobe and work lights, dome light and side-view mirrors are available.

Canopy installs in about 1 hour. The canopy and windshield are sold separately.

**About Curtis Industries**

Curtis Industries, LLC, an ISO 9001: 2008 certified company, is the leading manufacturer of cabs for compact tractors, golf cars and utility vehicles in addition to accessories such as lights, mirrors, alarms, windshield wipers and heaters for added safety and comfort. The company, which started in 1968, also manufactures truck plows and snow & ice control equipment for tractors and utility vehicles. Curtis markets its products through OEM vehicle manufacturers and a large network of dealers in the United States and Canada as well as Europe and Asia. The company operates from a 150,000 sq. ft. facility in Worcester, MA.
