**Curtis Industries Introduces Cab System for the
John Deere 4 Family Line of Compact Tractors**

Innovative cab design fits 4044R, 4052R and 4066R model tractors

Worcester, Massachusetts, July 17, 2015 - Curtis Industries, LLC manufacturer of cab enclosures, attachments and accessories for compact vehicles, announces the release of its cab system for the John Deere 4 Family compact tractors.

The cab was designed with the operator in mind, combining durable all steel construction with roomy interior comfort. The cab frame, doors and roof are constructed of powder-coated, commercial grade steel for durability and long life.

This versatile cab system features a venting tempered safety glass windshield, lift-up rear panel and dual sliding glass windows for superior ventilation in any weather condition.

The doors are designed with extra wide dual sliding windows, and lower glass panel. The total seal doors are pin hinged and remove in seconds - without tools - for open air operation in warmer weather.

Rear glass panel lifts and is held open on two gas shocks for quick conversion to backhoe operation. Operator can control the throttle from the driver seat during backhoe operation.

The Curtis cab is fully compatible with John Deere 4th and 5th Selective Control Valve (SCV) hydraulic outlet, allowing the operator to easily add a variety of implements and attachments. The cab fits power reverser models.

The cab includes a wiper and key controlled wire harness for the wiper and one accessory. Wiper has a 172 degree sweep arm. Factory fender lights relocate easily for unobstructed lighting. Cab is color matched for factory look.

A number of accessories are available including a 20,000 BTU heater, work and strobe lights and mirrors.

The cab mounts independently of the existing factory ROPS (Roll-Over Protective Structure). Cab Installs in under 4 hours.

About Curtis Industries

Curtis Industries, LLC, an ISO 9001 certified company, is recognized as one of the most innovative designers and manufacturers of compact vehicle enclosure systems, attachments and related accessories that enhance our customers' comfort and productivity. The company, which started in 1968, also manufactures truck plows and snow & ice control equipment for tractors and utility vehicles.
