**Curtis Industries Introduces Winch Lift
Utility Vehicle Plow**

Mounts in minutes with standard 2 inch receiver hitch

Worcester, Massachusetts, November 9, 2015 – Curtis Industries, LLC, manufacturer of cab enclosures, attachments and accessories for compact vehicles, announces the release of its new heavy-duty winch lift utility vehicle plow.

This durable plow is powder coated for corrosion resistance with a silver finish that complements any color vehicle. The plow features a 72" wide x 19" high adjustable full-trip moldboard with 6" double-sided cutting edge for longer life. It's designed with a 48" trip frame and heavy-duty springs to protect the plow and vehicle from ground obstructions.

The plow has five locking blade angles. The A-frame locking handle makes adjusting the blade angle quick and easy for efficient plowing. Pull the handle back, angle the moldboard and push the handle back to lock. It's simple. No complicated hydraulic hookup or electrical connections are needed.

Custom vehicle mount kits are designed for the John Deere Gator XUV and the Polaris Ranger XP 900. The mount kit bolts directly to the existing holes in the vehicle frame. No drilling is required. Once installed the plow easily mounts on standard 2" receiver hitch.

The plow includes adjustable skid shoes and reversible cutting edge for extended blade life. The Curtis plow is an exceptional value and built to last season after season.

The plow is perfect for schools, universities, parks, resorts, municipalities and home owners with acreage.

Curtis offers an optional snow deflector and blade markers for the plow. Other snow and ice accessories are also available such as spreaders, vibration kit, blade markers, gate control units and cab heaters.

About Curtis Industries

Curtis Industries, LLC, an ISO 9001 certified company, is recognized as one of the most innovative designers and manufacturers of compact vehicle enclosure systems, attachments and related

accessories that enhance our customers' comfort and productivity. The company, which started in 1968, also manufactures truck plows and snow & ice control equipment for tractors and utility vehicles.
